ABOUT US

We are a geospatial technology company delivering innovative Earth observation solutions, GIS, remote sensing, and analytics for real-world challenges.

INNOVATION

We leverage cutting-edge technology to deliver smarter solutions.

EXPERTISE

Our team combines domain knowledge with technical excellence.

RELIABILITY

We ensure accurate data, quality insights, and results.

SUSTAINABILITY

Our solutions support sustainable decisions for a more resilient future.

CLIENT SATISFACTION

We prioritize our clients and deliver tailored solutions.

OUR SERVICES

GIS & Spatial Analysis

Transforming earth analysis into actionable insights.

Remote Sensing Solutions

Multi-source satellite data acquisition and analysis.

Environmental Solutions

Monitoring ecosystems, and natural resources.

Applied Sectors

Agriculture, Disaster Management, urban planning, forestry, and coastal monitoring.

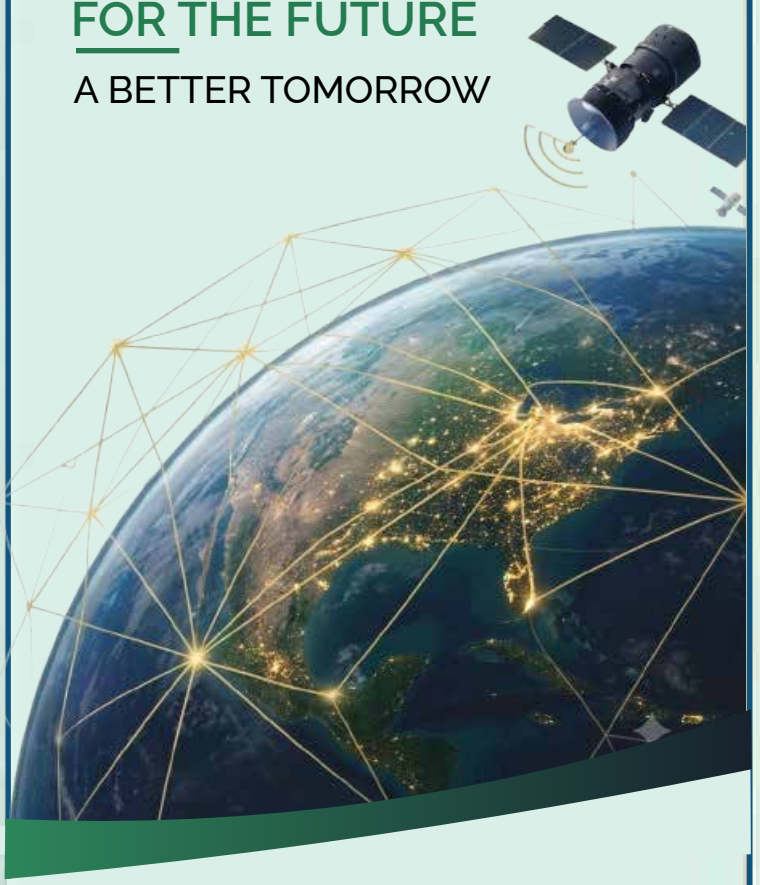

Consulting & Capacity Building

Technical consulting and training for organization support.

GEOSPATIAL SOLUTIONS

A PARTERNSHIP FOR THE FUTURE

A BETTER TOMORROW

EMPOWERING DECISIONS WITH LOCATION INTELLIGENCE

TECH SPATIOCORE PRIVATE LIMITED

OUR EXPERTISE

We deliver end-to-end geospatial solutions spanning GIS mapping and spatial analysis, remote sensing and Earth observation, environmental consulting, and geological analysis transforming raw earth data into actionable intelligence for informed decision-making. We also specialize in Health & Safety GIS, mapping risk and vulnerability for informed public safety decisions.

We also provide RS & GIS Training & Capacity building equipping individuals and organizations with practical geospatial skills for real-world application.

OUR PORTFOLIO

We follow a robust and scientific approach to deliver accurate and reliable results.

01

Case Study
Heat Extremes Assessment

Assessed Pakistan's 1990 to 2023 heat extremes using ETCCDI indices and remote sensing. Balochistan showed highest heat vulnerability, while pre-monsoon heatwaves dominated nationwide, supporting climate risk assessment, early warning, and resilience planning.

02

Case Study
Environmental Assessment

Conducted an environmental assessment for a Sahiwal cattle feed facility against ISO 14001 EMS requirements, identifying operational impacts and recommending improvements in resource efficiency, waste management, pollution prevention, and regulatory compliance.

03

Case Study
Drought Assessment

Assessed Southern Pakistan's 1990 to 2023 drought using meteorological and satellite data with SPI and RDI. The Study Area showed Persistent mild to moderate drought and recurring heatwaves. The Findings helped improve drought monitoring, water management, and climate adaptation.

WHY CHOOSE US?

- Expert team with diverse domain knowledge
- State-of-the-art tools and technologies
- High accuracy and quality solutions
- Timely delivery and scalable solutions
- Customer-focused and results-driven

> "Spatiocore Tech Pvt. Ltd. believe in the power of location data to drive preventive change and build a smarter, more sustainable world."

INDUSTRIES WE SERVE

Government | NGOs | Environment | Energy
