COMPANY PROFILE

Where Earth Data Meets Smart Solutions.

COMPANY PROFILE

SpatioCore Tech is a forward-thinking geospatial technology startup on a mission to turn complex Earth data into clear, actionable intelligence.

Founded by certified GIS and remote sensing professionals, the company bridges the gap between raw satellite imagery and real-world decision-making across environmental, geological, public health, and commercial sectors.

Every solution is grounded in scientific rigor, spatial precision, and a commitment to delivering meaningful insights rather than just maps.

Our Foundation

- Precision
- Integrity
- Innovation
- Spatial Intelligence

ABOUT COMPANY

At SpatioCore Tech, we believe location intelligence has the power to transform decision-making.

Using modern GIS platforms, satellite imagery, remote sensing technologies, and spatial analytics, we provide organizations with reliable information that supports planning, environmental management, disaster preparedness, geological studies, and public health initiatives.

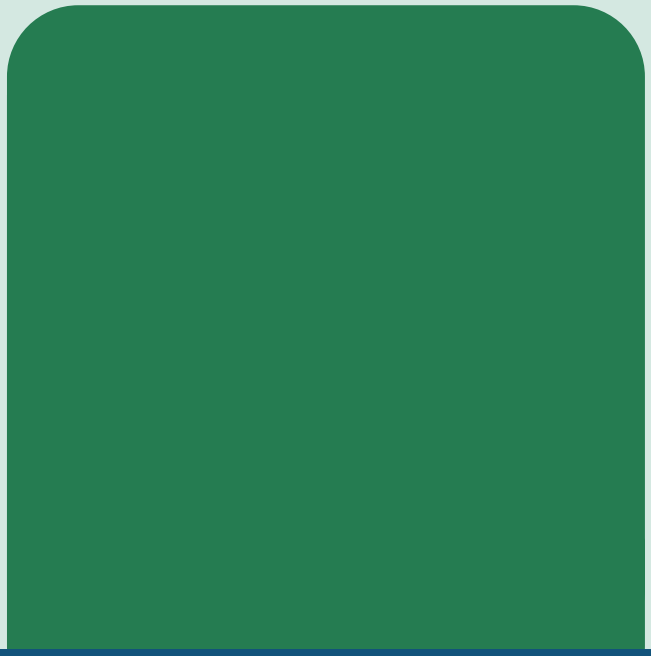

Why We Exist

To bridge the gap between raw Earth observation data and practical decision-making through reliable geospatial intelligence.

CEO STATEMENT

Leadership

At Spatiocore Tech, we believe that every environmental and development challenge presents an opportunity for innovation. By combining geospatial intelligence, Earth observation, and environmental expertise, we empower organizations to make informed decisions that create lasting social, economic, and environmental impact.

COMPANY HISTORY

2026

We Currently Working on three Projects. One is Internation And Two are National Level Projects.

2025

Assessed compound climate extremes in Pakistan's HKH region, revealing increasing drought variability, severe heat risks, and amplified impacts from concurrent extremes.

2024

Conducted an ISO 14001-based environmental assessment for a cattle feed facility, improving compliance, resource efficiency, pollution prevention, and sustainable operations.

2023

This study assesses heat extremes across Pakistan (1990–2023), identifying Balochistan as the most vulnerable region and supporting heat risk assessment, early warning, and climate-resilient planning.

MISSION
& VISSION

SpatioCore Tech leverages geospatial science and satellite data to deliver actionable insights that support informed, evidence-based decision-making across sectors.

To provide end-to-end geospatial services, from satellite to street level, that enable governments, researchers, businesses, and communities to understand their world and act upon it with confidence.

To be the world's most trusted geospatial technology company, transforming earth data into the intelligence that shapes a safer, smarter, and more sustainable world.

Geospatial Analyst

OUR SERVICES

Remote Sensing

Satellite image processing and Earth observation analysis for environmental and infrastructure applications.

GIS & Spatial Analysis

- Custom Mapping
- Geodatabase Design
- Land Use Planning
- Flood Zonation
- Network Analysis

Environmental Solutions

Environmental monitoring, ecosystem assessment, and spatial analysis supporting sustainable resource management.

Geology & Terrain

Terrain analysis, geological mapping, landslide assessment, and groundwater studies.

Health & Safety GIS

Spatial analysis for disease mapping, healthcare accessibility, emergency response planning, and public health decision support.

ADDITIONAL SERVICES

Applied Sector Solutions

- Agriculture
- Disaster Management
- Urban Planning
- Forestry
- Coastal Management
- Mining
- Transportation
- Public Health
- Environment & Conservation

Tools We Master

- ArcGIS Pro
- QGIS
- Google Earth Engine
- ENVI
- ERDAS IMAGINE
- Python
- PostGIS
- Sentinel Hub
- SNAP Toolbox
- Global Mapper
- DJI Drone

PROJECT
CASE STUDY

Representative projects showcased by SpatioCore Tech include:

1 Compound Climate Extremes

Analyzed 34 years (1990–2023) of climate data to assess drought, heat, and precipitation extremes in the HKH region, identifying increasing compound climate risks affecting glaciers, water resources, and ecosystems.

2 Heat Extremes in Pakistan

Evaluated heatwave trends across Pakistan using ETCCDI indices and remote sensing data (1990–2023), identifying Balochistan as the most heat-vulnerable region and supporting climate adaptation planning.

3 Environmental Assessment

Prepared environmental assessment reports for a cattle feed manufacturing facility, evaluating ISO 14001 EMS compliance and recommending improvements in environmental management, waste reduction, and regulatory compliance.

4 Drought Assessment

Integrated meteorological and satellite data (1990–2023) to assess drought severity, vegetation response, and heatwave interactions, providing insights for water resource management and agricultural planning.

5 Urban Suitability Analysis

Applied GIS-based Multi-Criteria Decision Analysis (MCDA) to identify suitable areas for sustainable urban expansion in Rawalpindi based on land use, slope, road accessibility, and waterway proximity.

COMPANY HIGHLIGHTS

Why Choose SpatioCore Tech ?

Multi-Platform Expertise

Proficiency in leading GIS and remote sensing technologies ensures the right tools are used for every project.

Startup Speed, Enterprise Quality

Fast communication and agile delivery while maintaining professional standards.

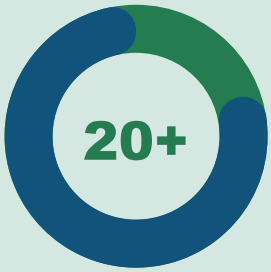

End-to-End Spatial Pipeline

From satellite data acquisition and preprocessing to analysis, mapping, and dashboard delivery.

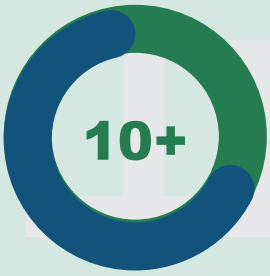

COMPANY HIGHLIGHTS

Client Satisfaction

Where Earth Data Meets Smart Solutions.

THANK YOU

We deliver precision geospatial intelligence solutions that transform satellite data into strategic, decision-ready insights. Our expertise spans GIS, remote sensing, environmental mapping, geological terrain studies, and health & safety spatial services, helping organizations solve complex spatial challenges with confidence.
